

SYSTEM AND METHOD FOR PROVIDING MULTI-PERSPECTIVE INSTANT REPLAY

ABSTRACT OF THE DISCLOSURE

A method for processing broadcasts comprises receiving a broadcast of the
5 program containing a plurality of perspectives of the program and presenting at
least one of the plurality of perspectives to a viewer. The method further includes
automatically recording the plurality of perspectives in a storage device and
playing alternate recorded perspectives for the viewer without interrupting the
recording of the broadcast. A system for recording a broadcast containing a
10 plurality of perspectives of a program is also disclosed.
